

## Worksheet W1 – See the World, Understand Industry, Shape Yourself

*Not graded. Both parts exist to leave an honest record of where you started.*

Group# \_\_\_\_\_ Student ID# \_\_\_\_\_ Department \_\_\_\_\_ Name \_\_\_\_\_

### Part A: Problem-Based Questions *(individually, before the W1 class; late uploads accepted until 23:59 on the day of W1)*

---

Study the assigned material individually — the W1 orientation page at <https://lolopodcast.github.io/PMCS-1151-W1/>. Write your answers **by hand** (on iPad or paper). **Do not use AI**. Take a clear photo of your work and upload it to the designated Moodle assignment area.

*Why by hand, and why no AI: from W3 onward this course uses AI in almost every assignment, and uses it deeply. That is exactly why the first one must not. It is the baseline you will compare against in W16, and writing by hand stops you producing fluent sentences that say nothing.*

*Part A and the W1 authentic self-introduction video (a separate task — see the orientation page) are the two W1 baseline items. Miss either by 23:59 on the day of W1 and you are strongly advised to drop the course; the TA will notify your department office. The class is capped at 36 and places are balloted — an early release lets the next person catch up.*

#### 1. See the World

Pick two of the three tensions on the orientation page and state your own position on each. Do not summarise what the page says — write what you think will happen. It can be short, but it must be specific enough that somebody could disagree with you.

---

---

---

#### 2. Understand Industry

Pick one industry you might want to enter. Using the chain industry → company → department → position → JD, explain which department or which job title the two tensions you chose would change first. If you cannot see it yet, that is a finding too — write it down honestly.

---

---

---

#### 3. Shape Yourself

Based on what you wrote above, name the one concrete thing you will do differently starting this term. Only one. "Read more" and "learn more skills" do not count — those are what people write when they have not decided yet. It must be specific enough to start next week.

---

---

---

## Part B: AI-Assisted Group Practice *(in your study group, during the W2 class)*

---

Part A was the unassisted snapshot. Part B is where the AI comes in — do not go back and rewrite Part A.

For each task below, run a full conversation with AI (prompts and answers), share the conversation link on Moodle, and use the result to prepare your in-class oral presentation and Q&A. Also save the transcript as plain text (.txt) in your group's shared folder — from W3 this is required every week, so treat this as the rehearsal.

### 1. World — Where you disagree

Put every member's Part A question 1 on the table and find the tension your group is least agreed on. Use AI to build the strongest case on each side, each carrying a date and a primary source. Then decide, as a group, which position you will bring to the class — and be ready to say why you did not take the other one.

**Deliverable:** *the conversation link, plus one sentence stating your group's position.*

### 2. Industry — Where the chain breaks

List the industries your members picked in Part A question 2 and choose one. Use AI to expand it into the five levels — industry → company → department → position → JD — with at least one real, checkable example at each level. Then mark the single link in the chain that your chosen tension reaches first, and say why that one.

**Deliverable:** *the five-level table, plus one circled break point.*

### 3. Yourself — Six things, one map

Collect the "one concrete thing" from every member's Part A question 3. Use AI to arrange them into a simple three-year map, marking which ones can support each other — the same competition, the same club, the same internship — and which ones run alone.

**Deliverable:** *the map, plus one sentence naming what your group collectively lacks.*

Three checks apply to everything the AI hands you here: the date, the primary source, and the dissenting view. Anything that fails one of the three does not go into your presentation. These are the same three checks you will use every week from now on.
